

Contactor magnets/ E Core

The core magnets, form the most important part of the contactor. ARUN contactor magnets, are best known for their precision. The silicon used is premium German/Japan grade and hence the hardness is always maintained with in 1.48 %.

RANGE

Contactor magnets as spares are available to all the contactor types we manufacture and some other prominent makes also.

Type	Catalogue Nos.
AK-1	AEC1
AL-1	AEC2
AL-2	AEC3
AL-3	AEC4

ARUN 10 SDM E Core

AEX E Core

FEATURES

- 1) Precision mix of mild steel and Silicon Cold Role Non grind Oriented, which ensures silicon hardness is ensured within 1.46 – 1.48 %. This in turn ensures, perfect functionality.
- 2) Precision of riveting at 0.002 mm
- 3) Lowest levels of power/watt loss
